Re: Analysis of Globe Industries, Inc.  
Waste Operating Permit Renewal Review  
Feddeler Solid Fill Site OPP 45-8  
Lake County

Dear Mr. Feddeler:

The application for the operating permit renewal, received on March 13, 1986, and the material safety data sheets for the raw materials used in the formulation of the Globe insulation materials, received on October 30, 1986, concerning the above referenced site has been reviewed. Based on staff comments, please submit the following additional information on the Globe Industries, Inc. waste to the Office of Solid and Hazardous Waste Management within 90 days from the receipt of this letter:

1. Analysis of the waste for EP Toxicity metals, corrosivity, Phenols, and reactivity.
2. A minimum of three composite samples representative of all waste streams shall be analyzed for all the parameters listed in Item No. 1.
3. Sampling, analysis, and quality control shall be done by the procedures described in EPA's SW-846, "Test Methods For Evaluating Solid Waste." The method of standard addition shall be used for analysis of all metals.

*has all been  
rec'd per  
Debussey K.  
4/5/89*

Staff will review the information provided to ascertain that the waste shall have a minimal environmental impact.

Mr. Thomas R. Feddeler

Re: Operating Permit Renewal Review  
Feddeler Solid Fill Site,  
OPP 45-8  
SW251  
Lake County

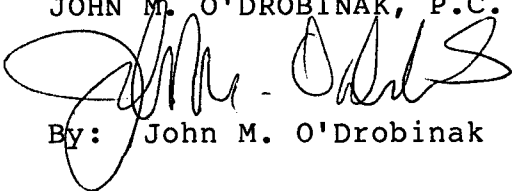

Dear Mr. Palin:

As per my correspondence of October 9, 1986, I am enclosing information received from the Generator of the solid waste material disposed of at the Feddeler Solid Fill Site. I have been advised by the Generator that the material safety data sheets for Poly (Polyethylene) film and EVA Resin are not included. They are being forwarded to the local Generator from their main corporate offices. I expect them shortly. As soon as they are received, I will forward them on to you.

I would appreciate being advised as to whether the information that has been submitted up until this time is satisfactory, or if additional information is required, other than as shown in this letter. Thank you.

Very truly yours,

JOHN M. O'DROBINAK, P.C.

Re: Operating Permit Renewal Review  
Feddeler Solid Fill Site, OPP 45-8  
SW 251  
Lake County

Dear Mr. Palin:

Enclosed is the Application to Transfer the above Permit from Mr. Edward Feddeler to Feddeler Enterprises, Inc.

In addition, you had requested in your correspondence of August 19, 1986, that certain information be provided to you within sixty days from the date of the receipt of your letter. We have requested such information from the Generator, Globe Industries, Inc. I have been advised that this information will be forthcoming, but it would appear that we will be unable to comply within the sixty-day period of time that your letter indicates. I expect to receive this information from Globe Industries within the next two to three weeks. I have verified this by telephone with the gentleman who is responsible for providing this information. Accordingly, we request that you extend the sixty-day period provided for in your correspondence of August 19, 1986.

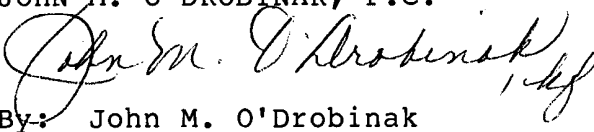

In addition, my Clients have been able to verify with the Engineer who had previously done the surveying work of the landfill site that the property is not within the 100 Year Frequency Flood Plain and/or Floodway.

Mr. Bruce H. Palin, Chief  
October 9, 1986  
Page 2

If any of the above matters are not acceptable to you, please advise immediately. Otherwise, we shall anticipate forwarding the necessary information to you as soon as the Generator provides it to us. It is my assumption that at that time, the transfer of the Permit will then be allowed. If additional information or data is required, please do not hesitate to contact me. Thank you.

Very truly yours,

JOHN M. O'DROBINAK, P.C.

State Form 3094

## INSTRUCTIONS FOR COMPLETING APPLICATION

1. **Permittee** Name of person, municipality, authority, firm, etc., whose name appears on the current construction permit and operating permit.
2. **New Applicant** Name of person, municipality, authority, firm, etc., whose name will appear on the appropriate permit and will conduct and be responsible for its operation.
3. **Property Owner** The property owner(s) of the land upon which the operation is located and conducted. If application for transfer is the result of new land ownership, the new land owner's name, address and signature is required.
4. **Legal Description** Legal description of the permitted sanitary landfill property proposed for transfer.
5. **Name of Facility** Example "Tri-County Sanitary Landfill," "Smith County Incinerator No. 2." Address must include street, road or rural route number, city, county, and zip code. Any change of name or address shall be included.
6. **Type of Operation** Incinerator, sanitary landfill, transfer station, resource recovery, composting, etc.
7. **General Information** Indicate the number of acres that are permitted and the total acreage owned by the property owner. Project the life of the facility in years. Indicate the daily volume received at the site.
8. **Permits** The construction and operating permit numbers shall be included.
9. **Permittee** The individual whose name appears on the existing construction and operating permit shall sign and date the application.
10. **New Applicant** The new applicant shall sign and date the application.

LEGAL DESCRIPTION

All that part of the West one-half of the Southeast one-quarter of Section 21, Township 33 North, Range 9 West of the Second Principal Meridian in Lake County, Indiana, lying East of the Easterly right-of-way line of the Indiana Harbor Railroad Company (Now New York Central Railroad), excepting therefrom that part described as follows: Commencing at a point on the Easterly right-of-way line of the New York Central at a distance of 40 feet North of the South line of said Section 21, thence East parallel to said South line, 263.40 feet, thence South 10 feet, thence East parallel to said South line 136.6 feet; thence South 30.0 feet to said South line, thence East along said South line 256.6 feet to the Centerline of a creek; thence North along the Centerline of said creek, 408.7 feet; thence North by Northwest along the Centerline of said creek, 409 feet, thence West by Northwest, 88.5 feet; thence Northwest, 244.5 feet to the Easterly right-of-way line of the New York Central Railroad; thence Southwesterly along said right-of-way line, 858.83 feet to the point of commencement.

Re: Operating Permit Renewal Review  
Feddeler Solid Fill Site  
OPP 45-8  
SW 251  
Lake County

Dear Mr. Feddeler:

Staff is in the process of reviewing the operating permit renewal for the Feddeler Solid Fill Site based on an application and renewal plot plan received at the Office of Solid and Hazardous Waste Management, formerly the Division of Land Pollution Control, on April 29, 1986. Please submit the following information to the Department of Environmental Management (DEM) within sixty (60) days from the date of receipt of this letter.

1. The generator must provide the State with a description and flow diagram of the manufacturing processes involved showing where each waste stream is generated. *Rec'd 10/30/86*
2. Annual quantities of each waste generated. *Rec'd 10/30/86*
3. A description of the raw materials used in the formulation of the Globe insulation materials, including material safety data sheets for each organic additive. *Rec'd 10/30/86*  
*except for Polyethylene film & EVA Resin.*
4. A description of the processing chemicals used in the formulation or fabrication of these materials. *Rec'd 11/21/87*
5. Verify that the site is not within a 100-year frequency floodplain and/or floodway, or submit a revised plot plan showing the extent of the floodway and/or floodplain. *DONE*

Staff will review the information provided and may require further testing to characterize each waste stream and to demonstrate that the wastes have minimal environmental impact.

Mr. Thomas R. Feddeler  
Page 2

Please submit a request for transfer to cover the transfer of permits from Mr. Edward Feddeler to Feddeler Enterprises, Inc., within sixty (60) days from the date of receipt of this letter. A copy of the blank form for the application for transfer is enclosed.

If you have any questions regarding this matter, please contact Mr. Duane Leith at AC 317/232-8858.

Very truly yours,

Dear Mr. Feddeler:

Re: Feddeler Solid Fill Site  
SW 251  
OPP. No. 45-8  
Lake County

As stated in Environmental Management Board 330 IAC 4-7-2 (Regulation SPC-18), "Operating permits shall be valid for a period of two years from the effective date of the permit."

The Agreed Order, which serves as your operating permit, for the above-referenced site will expire on March 15, 1986. Enclosed are two operating permit application forms.

Two completed applications for renewal of operating permits, to include two updated plot plans, must be submitted to this office at least 90 days prior to the expiration date of the permit. Evaluation of an operating permit renewal application will be based on the quality of operation during the period of the previous permit.

Specifics of the renewal evaluation are spelled out in 330 IAC 4-8-2(a) and (b) (Regulation SPC-18). This will be the only notice of the expiration of the operating permit. If a complete renewal application is not returned within the allotted time, the Board reserves the right to initiate appropriate action and/or levy civil penalties.

If you have any further questions concerning this matter, please feel free to call either Mr. David M. Brown or myself at this office at AC 317/243-5042.

VIA CERTIFIED MAIL

Mr. Mike Heffernan  
Globe Industry  
2638 East 126th Street  
Chicago, IL 60633

Dear Mr. Heffernan:

Re: Feddeler Solid Fill Site  
Lake County

On September 13, 1984, a meeting was held between Mr. Edward Feddeler and our office regarding the current denial of an operating permit reissuance and the resulting appeal of said denial. Please see enclosed memorandum for further details. The conclusion of this meeting resulted in an agreement to create a Consent Decree for the Feddeler Solid Fill Site to operate the site with the eventual reissuance of an operating permit if all conditions of the Decree are met.

Please note the Feddeler Solid Fill Site only has approval to receive insulation material from your company as stated in the October 21, 1981, operational permit (see enclosure). This stipulation will be re-emphasized in the future Consent Decree, and it will be taken into consideration during future inspections. Therefore, all non-insulation material classified as a solid waste (phenol bags, food waste, paper, cardboard, metal, wood, etc.) which are in need of disposal are required to utilize a permitted sanitary landfill.

If you have any questions, please feel free to contact Mr. Christopher Oppy at AC 317/243-5036.

Very truly yours,

*StCML*

Re: Feddeler Landfill

Gentlemen:

Enclosed is the Application for Renewal of the Landfill Permit for my above named Clients. The delay in responding and filing this Application is simply due to the fact that it was extremely difficult to find anyone to provide the topographic plat that was required. Once that person was found, it also took them a substantial length of time in order to complete the work. This is now enclosed and we trust that the Application has been prepared satisfactorily. If additional information is needed, please advise immediately. Thank you.

Very truly yours,

JOHN M. O'DROBINAK, P.C.

## INSTRUCTIONS FOR COMPLETING APPLICATION

1. **Applicant**  
Name of person, and/or corporation, municipality, authority, etc., which will conduct and be responsible for its operation.
2. **Property Owner(s)**  
The owner(s) of the land where operation will be located and conducted. Information provided must be the same as the information provided on the deed, recorded with the County Recorder of Deeds.
3. **Name of Facility**  
Example: "Tri-County Sanitary Landfill," "Smith County Incinerator Plant No. 2," "Lower Authority Transfer Station," etc. Location must include street, county road number or rural route number; city; county; zip code and operating permit number.
4. **Legal Description**  
Detailed legal description of the property permitted for landfilling.
5. **Documents Attached**  
The topographic maps described in Regulation SPC-18, Chapter III, Section 4(d), must be utilized to provide the required information for general refuse disposal and the separate area disposal of hazardous waste and included with this application. The topographic map is to include the boundaries of the permitted site.
6. **Type of Operation**  
Incinerator, sanitary landfill, transfer station, resource recovery, composting, conversion system, etc.
7. **General Information**  
Indicate the number of acres that are permitted and the total acres of landfilling completed. Project the life of the facility in years. Indicate the expected daily volume of waste received at the landfill.
8. **Waste Types Received**  
Check the type of waste accepted at the facility. \*NOTE: Hazardous and toxic wastes require written Indiana Stream Pollution Control Board approval.
9. **Signature**  
The applicant must provide the construction plan permit No. and sign and date the application affirming the statement above.

All information must be provided on this form or attachments or the application will be returned.

Feddeler S.F.S.

All that part of the West Half of the Southeast Quarter of Section 21, Township 33 North, Range 9 West of the 2nd Principal Meridian, in Lake County, Indiana, lying Easterly of the Easterly right-of-way line of the Indiana Harbor Railroad Company (now New York Central Railroad), excepting therefrom that part described as follows: Commencing at a point on the Easterly right-of-way line of the New York Central Railroad at a distance of 40 feet North of the South line, of said Section 21, and running thence East parallel to said South line, a distance of 263.40 feet; thence South 10 feet; thence East parallel to the South line of said Section 21 a distance of 136.60 feet; thence North at right angles to the last described line a distance of 808.80 feet; thence North 79 degrees 27 minutes West a distance of 244.5 feet to the Easterly right-of-way line of the New York Central Railroad; thence Southwesterly along said right-of-way line a distance of 858.83 feet to the place of beginning; Also excepting therefrom that part described as follows: A part of the Southeast Quarter of Section 21, Township 33 North, Range 9 West of the 2nd Principal Meridian, described as commencing at a point on the South line of said Section 21 and 400 feet East of the East right-of-way line of the New York Central Railroad; thence East along said line (which is also the center of the State Highway #2) to the center of a creek a distance of 256.6 feet; thence to the North along said creek center line 408.7 feet to an iron pin; thence North by Northwest along said center line 409 feet; thence West by Northwest 88.5 feet to an iron pin; thence South 808.8 feet to the place of beginning.

## SOLID FILL SANITARY LANDFILL POLICY STATEMENT

This policy is established primarily for the land disposal of demolition material in specially designed areas other than a sanitary landfill. It is considered an interim policy until the "Solid Waste Management Permit Regulation SPC-18" can be revised to reflect this type of landfill. Demolition debris and certain special wastes present unique problems for the sanitary landfill operator, the hauler, and the demolition contractor. Therefore, a Class III landfill variance from Regulation SPC-18 has been established to provide an environmentally acceptable disposal method.

### I. Definition

Demolition and Construction Debris--Those items affixed to the structure being demolished or constructed, such as bricks, concrete, stone, glass, wallboard, framing and finishing lumber, roofing materials, plumbing, plumbing fixtures, wiring, and insulation materials.

### II. Application Information

A Class III sanitary landfill application shall be accompanied by the following information:

- a. Written evidence of proper zoning with a legal description of the site;
- b. Topographic maps using a scale of 1" = 100 feet, with land contour intervals of 5 feet:
  - (1) Plot plan with the original site contours showing the method of operation and the direction it will proceed.
  - (2) Plot plan showing finished land contours.
- c. Entrance sign of 8 square feet to identify the operation;
- d. Source and type of soils to be used as cover material;
- e. Equipment to be used to provide daily compaction and cover material;
- f. Specify the day of the week the 6 inches of weekly cover will be applied.
- g. Provisions for back-up equipment;
- h. Procedures for handling bulky wastes;
- i. Procedures to be used to avoid and/or extinguish fire;
- j. Indicate the 100-year frequency flood level in the vicinity of the site; construction in the 100-year floodway must have approval of the Natural Resources Commission in addition to the approval by the Board;
- k. Provisions to control access to the site;
- l. Anticipated quantity, type and source of materials to be deposited.

### III. Operational Procedure

- a. All materials shall be worked and compacted at a minimum at the end of each operating day on a 3 to 1 slope at a minimum.
- b. Six inches of compacted cover soil shall be provided on a 7-day interval specified by the operator. A compacted weekly cover shall be applied regardless of weather.
- c. A firebreak consisting of one foot of compacted soil shall be provided every 25,000 cubic feet (an area equal to 50 feet by 100 feet by 5 feet) of fill volume or as otherwise approved.
- d. When any portion of the site reaches within 2 feet of final elevation, compacted final cover shall be applied, not less than 2 feet in depth. Vegetation shall be provided to prevent soil erosion. Final cover shall have a slope of not less than 2 percent without depressions that will cause ponding of water.

### IV. Class III Sanitary Landfill Approval

- a. The approval shall be valid for a period of two years from the approved effective date.
- b. Should any nuisance or pollution be created from said operation, immediate corrective action shall be initiated by the owner and operator to rectify the situation to the satisfaction of this office.
- c. This approval may be immediately revoked upon violation of your operational plan or any of the above operational criteria.
- d. Only demolition debris, construction debris, and wood products shall be classified acceptable Class III landfill material. All other solid waste is unacceptable.
- e. Any operation wishing to dispose of certain special waste may petition the Board or its designated agent to be classified as Class III landfill material.

Solid Waste Management Section  
Division of Sanitary Engineering  
Indiana State Board of Health  
1330 West Michigan Street  
Indianapolis, IN 46206

SOLID FILL SITE APPROVAL APPLICATION

1. Name and address of party responsible for quality of operation.

Edward J. Feddeler

21101 Wicker Avenue

Lowell, Indiana 46356

2. List the type of materials to be deposited on-site.

Only fill from Globe Industries, Inc., clay fill from excavations  
in Lowell area, or broken concrete or asphalt from Lowell area.  
(See copy of letter attached)

3. Identify the source and the type of cover material.

Clay fill, dug from the site, which has been stored on the premises  
until needed. Approx. 15,000 to 20,000 cubic yards have been stored  
on top to be used as needed.

4. Equipment to be used for placement and compaction of all refuse.

D 8 Caterpillar Bulldozer; 613 Caterpillar Scraper

5. Provisions made to have back-up equipment available.

TD18, International Bulldozer; 966 Caterpillar Hi-lift;  
H-100, Hough Hi-lift. All stored approx. 4 miles away.

6. Provisions for prevention of open burning.

No open burning permitted. There have been a few fires when Globe  
Industries sent debris out on fire and dumped it. A bulldozer  
smothers it with clay on the premises.

7. Provisions for control of access to the site.

There is only one entrance to the premises. A six foot fence  
encloses the premises and the gate is locked, except when the  
bulldozer is working. Robert Feddeler and his family live on  
the premises to provide security.

See attached legal and self-prepared topo map.  
(We are getting the appropriate one.)

Dear Mr. Feddeler:

Re: Feddeler Solid Fill Site  
SW 251  
OPP. No. 45-8

As stated in Environmental Management Board 320 IAC 5-7-2 (Regulation SPC-18), "Operating permits shall be valid for a period of two years from the effective date of the permit."

The operating permit for the above-referenced site will expire on November 1, 1983. Enclosed is an operating permit application form.

Completed applications for renewal of operating permits, to include an updated plot plan, must be submitted to this office at least 90 days prior to the expiration date of the permit. Evaluation of an operating permit renewal application will be based on the quality of operation during the period of the previous permit.

Specifics of the renewal evaluation are spelled out in 320 IAC 5-8-2(a) and (b) (Regulation SPC-18). This will be the only notice of the expiration of the operating permit. Failure to submit a complete renewal application is an indication that the site will be properly closed and cover procedures commenced by the expiration date of the operating permit.

Very truly yours,

Dan B. Magoun, Chief

Lowell, IN 46356

Dear Mr. Feddeler:

Re: Issuance of Operating Permit  
for Solid Fill Site Operation  
Feddeler Solid Fill Site  
Lake County

The review of information submitted in your application for an operating permit for a solid fill site has been completed. The solid fill project, located in part of the E 3/4 of the W 1/4 of the SE 1/4 of Section 21, T33N, R9W, containing approximately 35 acres, was issued a construction plan permit on August 7, 1981. This facility shall be operated in accordance with Stream Pollution Control Board Rule 330 IAC 4-1, et. seq. (Regulation SPC-18) and Construction Plan Permit SW 251.

The above-referenced solid fill project is hereby granted Operating Permit No. 45-8, with the following conditions:

1. That only insulation material from Globe Industries be deposited at the site.
2. That all material be worked and compacted on a 3 to 1 slope at the end of each operating day.
3. That six inches of compacted clay cover soil be in place on Saturday evening of each week regardless of weather.
4. That when any portion of the site reaches within two feet of final elevation, compacted final cover shall be applied not less than two feet in depth. Vegetation shall be provided to prevent soil erosion. Final cover shall have a slope of not less than two percent without depressions that will cause ponding of water.
5. That surface water drainage be diverted from the fill site and at no time is waste to be deposited in water.

6. That if nuisance or pollution conditions are created, immediate corrective action will be taken by the operator.

If you as applicant find that the terms and conditions of this permit are objectionable, you may petition for a hearing before the Environmental Management Board within fifteen (15) days after the date of receipt of this permit in accordance with Indiana Code 13-7-10-4(a).

If you have any questions regarding this matter, please contact Mr. Mark Richards of this office at 317/633-0176.

The operating permit is enclosed. Please post the permit and this letter in a conspicuous location at the site.

Very truly yours,

Ralph C. Pickard  
Technical Secretary

Lowell, IN 46356

Dear Mr. Feddeler:

Re: Issuance of Construction Plan Permit  
Feddeler Solid Fill Site  
Lake County

You are hereby notified that the Technical Secretary of the Environmental Management Board approved the final plans and specifications for the above referenced disposal site on this date.

The project consists of constructing a solid fill site in the E3/4 of the W1/2 of the SE1/4 of Section 21, T33N, R9W, containing approximately 35 acres. The area method of landfill is proposed for the disposal of insulation material from Globe Industries in Lowell.

You are hereby issued Construction Plan Permit SW 251 for the solid fill site with the following conditions:

1. That only insulation material from Globe Industries be deposited at this site.
2. That all materials be worked and compacted on a 3 to 1 slope at the end of each operating date.
3. That six inches of compacted clay cover soil be provided on Saturday of each week regardless of weather.
4. That when any portion of the site reaches within two feet of final elevation, compacted final cover shall be applied not less than two feet in depth. Vegetation shall be provided to prevent soil erosion. Final cover shall have a slope of not less than 2 percent without depressions to prevent ponding of water.
5. That surface water drainage be diverted from the fill site and at no time is waste to be deposited in water.

6. If nuisance or pollution conditions are created immediate corrective action be taken by the operator.

Any person aggrieved by the imposition of the above permit conditions may, within 15 days of the date of this letter, appeal to the Environmental Management Board for a hearing in accordance with IC 13-7-10-4(a).

Very truly yours,

Ralph C. Pickard

Schererville, IN 46375

RE: Feddeler Solid Fill Site

Dear Mr. O'Drobinak:

I have consulted with Bruce Palin and he informed me that while Mr. Feddeler may still choose to prove the material he accepts is inert, the tests required may be more expensive than providing aerial or topographical maps to the scale requested. I am enclosing a January 5, 1978 letter of Mr. David Lamm's explaining what is needed to prove the material accepted in the landfill is inert.

In choosing which route Mr. Feddeler will take, he should consider that the Stream Pollution Control Board will review whatever results he submits to them, plus staff recommendations, and then decide if the site has proven it accepts only inert materials. If it decides in the negative, Mr. Feddeler will then have to apply for an application. Further, if there are future problems and Mr. Feddeler has chosen to prove himself exempt as accepting only inert materials, the legal action open to the Board is injunctive action in a circuit court. If Mr. Feddeler proceeds to make an application, future problems can be settled in administrative proceedings.

I would suggest Mr. Feddeler check with other pilots and/or engineers as to the costs of providing topographical maps as \$5,000.00 seems a high price.

Please notify me as soon as possible whether Mr. Feddeler is going to proceed with the application or prove the material at the landfill is inert. I hope to hear from you by the time I return on August 4th.

Sincerely,

*Brenda*

Mr. George Oliver:

In response to answering the following questions of concern:

- D. Source and type of soils to be used as cover material:

The source of material to be used is clay loam which is adjacent to and ahead of the area to be filled. It is excavated with a scraper and hauled to an area behind and on top of the area being filled.

- E. Equipment to be used to provide daily compaction and cover material:

The equipment used and available for use are as follows:

- (1) A Catapillar D8 Bulldozer with an International TD 18 Bulldozer as a backup unit.
- (2) A Catapillar 613 elevating scaper to move the cover material.
- (3) A Catapillar 966B rubber tire loader to move cover material. This machine can also be used as a third bulldozer.

- F. Specify the day of the week the 6 inches of weekly cover will be applied:

This process will take place on Saturday wheather permitting or as soon as possible thereafter.

FEDDELER LAND FILL

Page 2

G. Provisions for back-up equipment:

The primary bulldozer and scraper are stored on the site. The backup equipment is stored 4 miles away with capability to be on the site within 1 hr. (24 hrs. a day 7 days a week.)

K. Provisions to control access to the site:

The access to the site is controlled by a cyclone fence with a gate that can be locked. This gate is in view from a house in which a partner lives.

L. Anticipated quantity, type and source of Materials to be deposited:

Amount received per week will be approximately 500 cu. yds.

Type & source of material is insulation and scrape materials from Globe Industries, Lowell, Ind. Broken concrete and asphalt from various excavations in area. Non organic scrap from local area.

The Depth of the fill will be from 0 to 20 feet with an average of about 10 foot.

If there is any further questions please let us know.

Very truly

Edward J. Feddeler, Ptr.

## INSTRUCTIONS FOR COMPLETING APPLICATION

1. **Applicant**  
Name of person, and/or corporation, municipality, authority, firm, etc., which will conduct the operation and be responsible for its operation.
2. **Property Owner(s)**  
The owner(s) of the land upon whose property the operation will be located and conducted. Information provided must be the same as the information provided on the deed, recorded with the County Recorder of Deeds.
3. **Name of Facility**  
Example: "Tri-County Sanitary Landfill," "Smith County Incinerator Plant No. 2," "Lower Authority Transfer Station," etc. Location must include street, road or rural route number; city; county; and zip code.
4. **Legal Description**  
Detailed legal description of the property proposed for the permitted facility. Indicate the location of the permitted facility on 7½ minute topographic map.
5. **Documents Attached**  
Check the appropriate block to indicate which documents are being submitted with the application. The information must be submitted in accordance with Chapters III and VI, Regulation SPC 18, in duplicate to the Stream Pollution Control Board, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, Indiana, 46206.
6. **Type of Operation**  
Incinerator, sanitary landfill, transfer station, resource recovery, composting, conversion system, etc.
7. **Permit Application**  
This form may be utilized as a Construction Permit Application, a Construction Permit Amendment and/or an Operating Permit Application. Indicate the application you are seeking. Insure that the information in No. 5 above is on file or is included.
8. **General Information**  
Indicate the number of acres to be considered for permit and the total acres owned by the property owner. Project the life of the facility in years. Indicate the expected daily volume of waste received at the facility.
9. **Waste Types Received**  
Check the types of wastes planned for disposal at the facility.  
**\*NOTE:** Hazardous and toxic wastes require additional engineering information.
10. **Signature**  
The applicant and property owner must sign and date the application.

All information must be provided on this form or attachments, or the application will be returned.

TO: Brenda Rodeheffer  
Attorney General's Office

FROM: Bruce Palin  
Solid Waste Management Section

SUBJECT: Review of Feddler Solid Fill Site Application

The staff has completed their review of the Feddler solid fill site application and determined that it is incomplete. The following items need to be addressed to make the application complete:

1. A topographical map of the existing elevations of the site with a scale of 1-inch equals 100-feet, and contour intervals of 5-feet.
2. A topographical map of the proposed final elevations of the site with a scale of 1-inch equals 100-feet, and contour intervals of 2-feet.
3. A drawing of the entrance sign.
4. An indication of which day through the week the 6-inches of weekly cover will be applied.
5. An updated description of the Globe Industry waste.
6. The attached application needs to be signed.

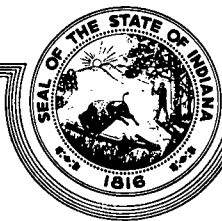

There are two additional items which the staff would like to request in order to assess the suitability of the site. One is the proposed depth of excavation and the other is three soil borings of the property conducted through consultation with the Solid Waste Management Section staff. If you have any questions please feel free to contact me.

## INSTRUCTIONS FOR COMPLETING APPLICATION

1.      **Applicant**

Name of person, and/or corporation, municipality, authority, firm, etc., which will conduct the operation and be responsible for its operation.
2.      **Property Owner(s)**

The owner(s) of the land upon whose property the operation will be located and conducted. Information provided must be the same as the information provided on the deed, recorded with the County Recorder of Deeds.
3.      **Name of Facility**

Example: "Tri-County Sanitary Landfill," "Smith County Incinerator Plant No. 2," "Lower Authority Transfer Station," etc. Location must include street, road or rural route number; city; county; and zip code.
4.      **Legal Description**

Detailed legal description of the property proposed for the permitted facility. Indicate the location of the permitted facility on 7½ minute topographic map.
5.      **Documents Attached**

Check the appropriate block to indicate which documents are being submitted with the application. The information must be submitted in accordance with Chapters III and VI, Regulation SPC 18, in duplicate to the Stream Pollution Control Board, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, Indiana, 46206.
6.      **Type of Operation**

Incinerator, sanitary landfill, transfer station, resource recovery, composting, conversion system, etc.
7.      **Permit Application**

This form may be utilized as a Construction Permit Application, a Construction Permit Amendment and/or an Operating Permit Application. Indicate the application you are seeking. Insure that the information in No. 5 above is on file or is included.
8.      **General Information**

Indicate the number of acres to be considered for permit and the total acres owned by the property owner. Project the life of the facility in years. Indicate the expected daily volume of waste received at the facility.
9.      **Waste Types Received**

Check the types of wastes planned for disposal at the facility.  
\*NOTE: Hazardous and toxic wastes require additional engineering information.
10.     **Signature**

The applicant and property owner must sign and date the application.

All information must be provided on this form or attachments, or the application will be returned.

Re: Feddeler Solid Fill Site

Dear Mr. O'Drobinak:

The matter of the Feddeler solid fill site has been referred again to this office for resolution. It has been over two years since the State of Indiana filed its Complaint praying for either closure of the Feddeler site or securing of a permit. The State has continued to pursue those same goals throughout the negotiations with you and your client since the filing of that Complaint.

Your letter of October 22, 1979, to Mr. Bruce Palin of the Indiana State Board of Health requests information on how to resolve the problem. I am enclosing copies of previous letters sent to you from the Solid Waste Management Section. These letters and the appropriate enclosures outline what has been and is now required of Mr. Feddeler to come into compliance with State laws.

Due to the long delay in resolving this problem, it is now required that Mr. Feddeler either submit an application for a Solid Waste Management Facility or submit documentation that all material he accepts is inert. The Solid Waste Management staff prefers that Mr. Feddeler apply for a Solid Waste Landfill permit and an application form is enclosed.

If the information requested is not sent within thirty (30) days of the receipt of this letter, I will advise the Solid Waste Management Section to take immediate legal action.

Sincerely,

  
Brenda Franklin Rodeheffer  
Deputy Attorney General

Division of Sanitary Engineering

Dear Mr. Pallin:

Re: Feddeler Solid Fill Site

Enclosed is a copy of a photocopy of a letter I have received from the Lake County Plan Commission. I believe the letter is self-explanatory. As you can see, it indicates that we have no problems as far as Lake County is concerned.

The second matter which has to be resolved in order to resolve this present problem is to satisfy you and the people of your department. After you have had the opportunity to review the contents of this letter and its attachment, I would appreciate your contacting me so that we may discuss the next steps that are to be taken to lay this matter to rest once and for all. Your prompt attention to this request would be greatly appreciated. Thank you.

Very truly yours,

JOHN M. O'DROBINAK, P.C.

VIA CERTIFIED MAIL

Mr. Jack O'Drobinak  
833 West Lincoln Highway  
Schererville, Indiana 46375

Dear Mr. O'Drobinak:

Re: Feddeler Solid Fill Site

This will acknowledge your phone conversation with Mr. Bruce Palin on August 18, 1977, concerning the above-referenced site.

Enclosed is a Solid Fill Site Approval Application to be filled out and submitted along with the following information:

1. Proof of proper local zoning for landfilling.
2. A legal description of the area to be filled, including acreage.
3. A topographical map indicating the present site contours at intervals of five feet.
4. A topographical map indicating the final site contours at intervals of two feet.

It is recommended that you contact Mr. Jim Stevens of the Lake County Planning Commission as soon as possible to begin the procedures for obtaining local zoning.

The staff requests that you submit the information requested in items 2, 3, and 4 above within 45 days of the date of this letter. If you have any questions, please feel free to contact Mr. Bruce Palin of this office.

Very truly yours,

David D. Lamm, Acting Chief  
Solid Waste Management Section  
Division of Sanitary Engineering
